Alana Water Butt

The Alana's unique surface design makes this water butt really impress. The integrated planting space at the top is approximately 27cm deep allowing for gravel or stones at the base of the chamber for drainage if required (not included).

Rain diverters can be fitted at either side of the water butt at the subtly marked points (instructions included).

The butt features a $\frac{3}{4}$ " brass connection point for a screw in tap and a side outlet near the base for draining or connecting to another tank.

Available in three stunning colour finishes. The Grey Granite finish has a slight fleck in the colour which creates a superb appearance. Supplied with chrome tap.
